

KIT CONTENTS

This kit was developed by the Alaska Herpetological Society (AHS) in cooperation with the National Park Service (NPS). It can be checked out on a semi-permanent basis for use by teachers and the general public. Please be aware that handling native amphibians for scientific / educational purposes does require a permit, so record observations without handling animals whenever possible, unless you're accompanied by an AHS representative. Thanks so much and have fun!

The original contents of this kit include:

1. Folder with Educational Materials
2. Kodak Easyshare Camera w/ 8gb SD Card & Hard Case
